SOFTWARE ENGINEERING EXPERIENCE

General Assembly - '19 June-August
500+ hour Software Engineering Immersive program
- Front End Development and Back End interaction
with API
- Built Full-Stack applications using HTML5/CSS, JavaScript, React,
Express and Ruby on Rails
- Team experience: sprints, GitHub workflow, pair-programming
and mob programming

PROJECTS

Mattcersize

Workout Tracker SPA | **Full-Stack**
- Built using React and Express
Mattcersize is an intuitive and easy to use workout tracker that allows
users to create and organize their workouts and keep track of specific
exercises within each. Mattcersize is mobile-friendly and built using
React and will soon be converted into React-Native to be a true mobile
app for both android and iOS.

Rocket Surveys

Survey taking/maker SPA | **Full-Stack**
- Built using HTML/JavaScript and Express
Rocket surveys is a simple survey application that allows users to
create multiple types of surveys and take surveys created by others.
Rocket Surveys makes it easy for users to quickly ask questions and
see responses from others to their questions.

Nugpad

Notepad SPA | **Full-Stack**
- Built using HTML/JavaScript and Ruby on rails
Nugpad is a simple notepad application that users can quickly jot down
their ideas and easily access them when needed. Notes can be edited as
needed and deleted when no longer needed.

OTHER EXPERIENCE

Wedding security & server Saphire Estate - Sharon, MA 2014-17
- Enforced security for Saphire event group consisting of policy
enforcement and ensuring safety of guests during
weddings, anniversaries and large celebrations
- Provided high level of service and engagement with guests while
serving large groups
